The BEGONIA MAXIMA is a new variety that has all the characteristics of a beautiful Begonia. Its main features are abundant flowers in vivid colors, fully double like the camellia type, grow on tall and thin, but strong stems, which thus provide a wealth of blossoms above the foliage. Both flowers and foliage are smaller than those of regular double begonias and also possess more distinguishing and subtle details. The MAXIMA BEGONIA tubers come in only one size (1" and Up) and generally measure between 1¼ - 1½". The size of the bulbs bears no direct relationship to the quality of the plant it will produce the following summer.

* Similar to scarlet, but grows dark red tinted leaves and is more attractive.
